

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24383

Stream : Cline Creek

Applicant : Town of Roachdale
Theodore E Knowling
PO Box 198
Roachdale, IN 46172-0198

Description : Approximately 50' of the creek will be straightened. The excavated material from the west bank will be used as fill on the east bank. The banks will be stabilized with riprap. Details of the project are contained in information and plans received at the Division of Water on June 20, 2007 and August 16, 2007.

Location : Beginning approximately 100' south of the State Road 236 crossing and continuing southeast for approximately 50'
near Roachdale, Franklin Township, Putnam County
NW¼, NE¼, NW¼, Section 12, T 16N, R 3W, Roachdale Quadrangle
Quad Code: 3908677
UTM Coordinates: Downstream 4411015 North, 516608 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24395

Stream : Little Calumet River

Applicant : Town of Porter
Bill Sexton
Redevelopment Commission
303 Franklin Street
Porter, IN 46304-1720

Description : A bridge will be constructed over the Little Calumet River as part of the Orchard Pedestrian Way to provide a pedestrian path across the river. The new structure will be four simply-supported bridge spans that bear on concrete piers. The span across the river will be approximately 75'. The remainder of the spans that do not cross the river are approximately 60'. The clear width of the bridge will be 10' and the overall width will be 12'. The simply supported bridge is anticipated to be either wood or structural steel trusses. The concrete piers that are immediately adjacent to the river will be parallel to the river at that location to align with the stream flow. The other bridge piers will be skewed approximately 10 degrees to the river but are placed at a higher elevation not impacting normal flow rates. No temporary construction access across the river is anticipated. A construction road is proposed on either side of the river. To construct the piers adjacent to the stream, a temporary earthen cofferdam is anticipated. However, it is not anticipated that the cofferdam will be constructed into the river to impede the flow. Once the piers are completed, the cofferdams will be removed. The project is partially federally funded through the Indiana Lake Michigan Coastal Program. Details of the project are contained in information received electronically at the Division of Water on July 3, 2007 and in plans and information received at the Division of Water on August 16, 2007.

Location : The west side of Waverly Road just south of I-94 north
near Porter, Westchester Township, Porter County
NE¼, NE¼, NE¼, Section 35, T 37N, R 6W, Chesterton Quadrangle
Quad Code: 4108751
UTM Coordinates: Downstream 4607825 North, 494363 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24426

Stream : Iroquois River

Applicant : City of Rensselaer
Kenny L Haun
124 South Van Rensselaer Street
Rensselaer, IN 47978-2815

Description : A pedestrian bridge to be constructed over Iroquois River, allowing for the connection of the existing Red Bud Trail system, and easy access to the Weston Cemetery. The main webs of the bridge will be constructed from steel ¼" by 19" by 95' along with 4" I-Beams 4' long being used as cross members. Main decking to be from 1-3/8" hardwood. An additional 45" by 4' ramps will be used at grade level and will be elevated to a maximum of 7' in the 45' run. The structure will have a total length of 185' the supporting piers will be placed approximately 12' from the floodway and placed in the flood fringe. Supporting piers will be made of formed concrete with rebar reinforcement. Banked sideslopes armored with limestone riprap placed over a geotextile fabric. The abutments and piers will be skewed to align with stream flow. The main bridge and ramps will have equipped hand railing along the sides to insure the safety of citizens. The project is through funded through donations. Details of the project are contained in information received electronically at the Division of Water on July 26, 2007 and in plans and information received at the Division of Water on August 14, 2007.

Location : Approximately 1800' west of the Home Avenue and US 231 intersection at Rensselaer, Marion Township, Jasper County

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24435

Stream : Niles Ditch

Applicant : Michael Kratofil
8900 Keystone Crossing
Suite 775
Indianapolis, IN 46240-7644

Description : The existing 121st avenue single span stream crossing will be resurfaced. Riprap and geotextiles will be placed immediately upstream and downstream of the stream crossing for bank stabilization. Details of the project are contained in information and plans received at the Division of Water on July 31, 2007.

Location : At the 121st Avenue stream crossing
near Crown Point, Center Township, Lake County
E½, Section 14, T 34N, R 8W, Crown Point Quadrangle
Quad Code: 4108743
UTM Coordinates: Downstream 4583018 North, 474780 East

Application # : FW-24455

Stream : Wabash River

Applicant : **Indiana Department of Natural Resources
Division of Fish & Wildlife
Gregg McCollam
402 West Washington Street, Room W273
Indianapolis, IN 46204-2781

Description : A new 8' wide by 60' long concrete ramp is proposed. Approximately 14 cu. yards of riprap will be used for the ramp base and river bank for erosion control. In addition, a 75' by 66' gravel parking area will be constructed in a vacant lot adjacent to the proposed ramp. Details of the project are contained in information and plans received at the Division of Water on August 14, 2007.

Location : On the north river bank along East Wabash Avenue
near Logansport, Eel Township, Cass County
NE¼, SW¼, SE¼, Section 31, T 27N, R 1E, Logansport Quadrangle
Quad Code: 4008673

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24458

Stream : Harper Ditch

Applicant : Vanderburgh County
Bill Jeffers
Civic Center Complex, Room 305
Evansville, IN 47708-1833

Description : The intersection of State Road 62 and Green River Road will be rehabilitated. As part of this intersection rehabilitation, the existing culverts carrying Hirsh Ditch Legal Drain under Green River Road will be replaced. Structure 33 carrying Hirsh Ditch Legal Drain under Green River Road is a 2,400-mm (94 inch) culvert that has a 45-degree bend in the center. Structure 34 carrying Hirsh Ditch Legal Drain under Green River Road is a 1,800-mm (70 inch) culvert. It is proposed that approximately five meters (16.4 feet) of culvert on the western end and 12 meters (39.4 feet) of culvert on the eastern end of Structure 33 will be removed, and the pipe ends plugged. The remaining portion of the culvert will stay in place. Structure 34 will be removed entirely and replaced with Structure 54, which is a 3,658-mm by 2,438-mm (~12 foot by 8 foot) concrete box culvert 50 meters (164 feet) long. The replacement is necessary to increase the hydraulic capacity of the structure and to help reduce upstream flooding. Additionally, approximately 20 meters (65.6 feet) of riprap will be used to stabilize the streambed and bank both upstream and downstream of the new structure. It is not anticipated that any tree removal will be required along Hirsh Ditch Legal Drain as part of this project. Details of the project are contained in information received electronically at the Division of Water on August 20, 2007 and in plans and information received at the Division of Water on

Location : The proposed project is located at the intersection of SR 62 (Morgan Avenue) and Green River Road
at Evansville, Knight Township, Vanderburgh County
Section 23, T 6S, R 10W, Newburgh, IN-KY Quadrangle
Quad Code: 3708784

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24461

Stream : Laughery Creek

Applicant : Ripley County Board of Commissioners
Owen T Heaton, Jr.
2710 North Hasmer Hill Road
Osgood, IN 47037-9020

Description : Erosion damage to the existing pier wall will be repaired with the construction of a reinforced concrete toe wall keyed into the bedrock below the flowline of Laughery Creek. Also, a scour hole that has developed around the pier will be filled in to protect the new toe wall and the pier from additional erosion damage. The toe wall will be 2' wider in length and width than the pier, but will not extend above the top of the proposed fill. The top of the proposed fill will be 1' to 2' lower than the surrounding ground. The plan area to be filled is approximately 3340 square feet (0.08 acre), rough circular in shape, and varies in depth from 0 to 5'. This hole is an ineffective portion of the high water flow area. The approach roads will not be raised. All work will occur outside of the low flow channel. Details of the project are contained in information received electronically at the Division of Water on August 22, 2007 and in plans and information received at the Division of Water on

Location : Cave Hill Road where it crosses Laughery Creek. Approximately 6.2 mi. SE of Versailles.
Near Olean, Johnson Township, Ripley County
Section 33, T 7N, R 12E, Milan Quadrangle

30 Day Public Notice Report

Application # : PL-20796

Lake : Oliver Lake

Applicant : Oliver Lake Resort Cooperative, Inc
Ken Wilson
210 Growth Parkway
Angola, IN 46703-9331

Description : A temporary group pier will be placed at the south end of the applicant's frontage to provide dock space for approximately 34 watercraft. The new pier will be extend approximately 150' lakeward of the lake's legal shoreline. Also, a total of 22 temporary piers will be placed along the channel frontage to provide dock space for approximately 44 watercraft. The piers will be spaced 22' from each other along the channel. A new bioengineered seawall will be constructed across 487' of the applicant's channel frontage. The lakeward face of the wall will be located along the lake's legal shoreline. The channel bank will be slightly regraded prior to seawall installation. In addition, a 317' glacial stone retaining wall will be placed above Oliver Lake's Legally Established Lake Level and landward of the lake's legal shoreline. Details of the project are contained in information and plans received at the Division of Water on July 3, 2007, July 20, 2007, August 1, 2007 and August 22, 2007.

Lake : Big Chapman Lake

Applicant : Tamara S Phillips
320 West Arthur Street
Hicksville, OH 43526-1026

Description : An access will be excavated to provide access. The channel is approximately 175' long, 15' wide and will be excavated to a depth of 5' below the existing grade. It has 1:1 side slopes which were stabilized with concrete. Fill removed from the excavation will be hauled to a disposal site located outside of the floodway where it will be graded and seeded. The construction will require the excavation of 15 yds of material. Maintenance dredging will be performed on an as needed basis. During construction an earthen plug will separate the river from the channel. Once the excavation has been completed and stabilized, the plug will be removed and the channel flooded. Details of the project are contained in information received electronically at the Division of Water on August 21, 2007 and in plans and information received at the Division of Water on

Applicant : Michael Gumz
4825 State Road 331 South
Bremen, IN 46506-9723

Description : A new vinyl seawall will be constructed along 107' of the applicant's property following the lakes legal shoreline. The wall will consist of 18" x 7' sheets driven 5' into the lakebed leaving a 2' exposure from the lake bottom. The wall will then be capped with an aluminum cap with a heavy aluminum whale insert under the cap that will be tied back to the bank every 4.5' with a deadmen system. Clean pea stone will be used for backfill behind the wall then topped of with 3 to 4" of screened topsoil graded to the existing ground level. A 20' by 10' underwater beach will be installed in the center of the property; clean pea gravel will be pumped to the lake and spread in a very uniform 6" layer by working with a floating discharge hose. Details of the project are contained in information received electronically at the Division of Water on August 22, 2007 and in plans and information received at the Division of Water on
